Summary

Data platform engineer with nine years of experience building streaming pipelines, workflow automation and analytics platforms. Led the digital transformation of batch reporting into real-time Kafka services with a focus on reliability and cost optimization.

Skills

Languages: Python, Scala, SQL, TypeScript

Data: Apache Kafka, Airflow, dbt, BigQuery, Snowflake

Platform: Kubernetes, Terraform, AWS, Fluxgate

Experience

Senior Data Platform Engineer | Northwind Logistics | Seattle, WA | Jan 2021 – Present

- Architected a Kafka streaming platform that processes 4 billion events per day with 99.95% availability.
- Led the transformation of nightly batch jobs into real-time workflows, cutting reporting latency from 6 hours to 4 minutes.
- Built a self-service data quality framework in Python adopted by 14 product teams.
- Reduced cloud infrastructure cost by 31% through storage optimization and right-sizing Kubernetes clusters.

Data Engineer | Fabrikam Health | Portland, OR | Mar 2017 – Dec 2020

- Designed HIPAA-compliant ingestion pipelines for clinical analytics using Airflow and dbt.
- Migrated 300 legacy ETL scripts to a hybrid cloud platform with automated testing.
- Mentored 5 engineers and ran the internal data engineering certification program.

Software Engineer | Contoso Retail | Boise, ID | Jun 2015 – Feb 2017

- Shipped inventory forecasting services in Scala that improved stock efficiency by 12%.
- Wrote the affiliate attribution service handling 2 million clicks per day.

Education

B.S. Computer Science | University of Lakeshore | 2011 – 2015

Certifications

AWS Certified Data Analytics – Specialty | Amazon Web Services | 2022

Certified Kubernetes Administrator | Cloud Native Computing Foundation | 2021
