Engineering Leadership, Platform Strategy, Incident Management, API Gateway Design, Go, Kubernetes, Terraform, Tessellate DSL

Academic Background

B.S. Electrical Engineering | Mesa State Institute | 2008 – 2012

About

Engineering manager who builds platform teams and the internal tooling they rely on. Known for attention to developer experience, pragmatic architecture and calm incident leadership.

Career History

Engineering Manager, Platform | Adatum Cloud | Denver, CO | Apr 2019 – Present

- Grew the platform organization from 6 to 22 engineers across 3 teams with 92% retention.
- Launched an internal developer portal that reduced service setup time from 2 weeks to 1 day.
- Ran the API gateway consolidation that retired 11 bespoke proxies and simplified on-call.

Staff Software Engineer | Wingtip Toys | Boulder, CO | Sep 2014 – Mar 2019

- Designed the order workflow engine in Go that handled the holiday peak of 18,000 orders per minute.
- Introduced service level objectives and an incident review process adopted company-wide.
- Wrote the settings service and its YAML schema used by 40 microservices.

Selected Projects

Pipeline Lint: Open source linter for CI workflow files with 1,200 GitHub stars.

On-call Atlas: Shift scheduling tool that balances on-call load across time zones.
